The EPA has no objections with moving forward with the proposed Corrigan Ranch Mitigation Bank. It is our understand that only Phase 1 of the original prospectus (which include 5 phases) will be implemented through the permitting process. Phase 1 is located adjacent to existing conservation lands, which assists in a favorable appropriateness determination.

Not sure what time our meeting is Monday, but I am now "not available" between 9 and 11 that day. Been called into a meeting I must attend.

I'm in the field the rest of the week. In next week on Monday only.

Hey guys. I need to schedule a conference call to discuss Corrigan Ranch. I'm available the rest of the week. They submitted a reduced proposal, just one phase (instead of five). We originally advertised the project with the five phases. There is no need to re Public Notice it since its essentially the same proposal but at a reduced scale. I never received any comments from the IRT at the time we advertised it the first time.

Thanks.

Vivian
